Indoor Rowing
Health & Fitness Market Segmentation
March 2017
Background and objectives

- British Rowing want to take a consumer focused approach to understanding the current and potential indoor rowing market

- Through understanding the demographics, attitudes, motivations and barriers towards sport/fitness and indoor rowing specifically, British Rowing seek to:
  1. Grow the number of indoor rowers within 5 years
  2. Unite the indoor rowing industry (across commercial equipment manufacturers, health and fitness operators, fitness professionals and other suppliers)
  3. Reposition indoor rowing as a key part of the sport, so that every indoor rower identifies themselves as a rower

- Market segmentation will be used to inform and support the development of products, activities and innovations that improve the indoor rowing experience and overcome barriers to participation
Research objectives and methodology

Overall, to understand and segment prospective and current indoor rowers, bringing them to life as pen portraits and ultimately, identifying the biggest opportunities to double participation in the next 5 years

Segment current and prospective indoor rowers
Identify biggest opportunities to drive participation in indoor rowing
Create clear and compelling segment pen portraits

To achieve these aims, we used a mixed methodology:

Qualitative Expert Interviews and BRIC* Intercepts (Dec ‘16)
Quantitative online survey (Dec ‘16-Jan’17)
Qualitative Activation workshops (Feb-March ‘17)

*BRIC: British Rowing Indoor Championships
Who the research spoke to

**Qualitative Expert Interviews and BRIC Intercepts**
(Dec ‘16)

Sample definition
Expert interviews with indoor rowing service providers and partners (n=8)
Intercepts with BRIC* 2016 event attendees (n=27)

**Quantitative online survey**
(Dec ‘16-Jan’17)

Sample definition
16-64s in England, who have exercised in the last 3 months, are a current/former gym/leisure centre member/attend(ed) pay as you go classes and don’t reject using an indoor rowing machine

N=501
Panel sample completes

N=148
BRIC attendee completes

**Qualitative Activation workshops**
(Feb-March ‘17)

Sample definition
Activation workshops with 3x opportunity segments (n=6-8 per group): Fitness Fanatics, Routine Driven and Socially Motivated

*BRIC: British Rowing Indoor Championships*
The opportunity

- There are an estimated **1.3m indoor rowers** in England; a larger participant base than APS data would suggest (~170k), driven by:
  - People using rowing machines as part of a workout but **not considering themselves ‘rowers’**
  - The majority of indoor rowers using a machine for **up to 30 minutes** in a session, thus not qualifying for the historic APS definition
- The opportunity for indoor rowing is vast; **15.8m would consider using a rowing machine**, 13.3m of whom have used one before
- A **good infrastructure** for growing the sport is already in place, **79% have access** to a rowing machine; but despite high access, only around **1 in 4** gym goers are indoor rowing
- Challenge is to **make indoor rowing ‘stickier’**, encouraging trial and continued use of rowing machines over competitor equipment or provision
- By looking at the different attitudes and motivations for exercise in general, **six segments** have been identified in this research pulled apart by their **level of motivation to exercise, how they are motivated** (by themselves or others) and **competitiveness**
- As this report will show, there are a **number of engagement opportunities** for getting more people into indoor rowing
  - However, it is not a ‘one size fits all’ approach and consideration is needed for how best to **prioritise** and **target** different segments
What we can learn about indoor rowing from current participants

Only 1 in 4 indoor rowers identify themselves as ‘rowers’; this increases among those who use the machines for a greater amount of time – challenge is to get people rowing for longer.

4 in 5 indoor rowers spend less than 30 minutes on a machine in a typical session; need to showcase the benefits and variety of workouts available to encourage greater usage.

1 in 3 indoor rowers use the machine as the main part of their workout; majority use it to supplement a routine or for warming up – need to show how indoor rowing can be a more focal part of routines.

3 main reasons for using a rowing machine:  
1) To improve fitness / stamina  
2) To increase upper body strength  
3) To improve general health / wellbeing

Need to dial-up the ‘full body workout’ message to potential audiences as a ‘hook’ for indoor rowing.

1 in 2 indoor rowers are self-taught; opportunity to upskill personal trainers and gym staff to educate rowers (and potential rowers) in how to use the machines correctly.

C1 (consideration as a rower), C3d (how indoor rowers learnt to use machines), C3f (time spent on rowing machine in typical session), C3g (distance rowed for in typical session), SQ10 (where rowing machine is currently used), C7 (main reasons for using rowing machines). Base: Current indoor rowers (75)

“Being active is a big part of my life. I like to be physically challenged but also appreciate the mental benefits of exercise too. Variety when working out is very important to me, as is being able to track my performance in the gym.”

“I have a set workout routine that I stick to religiously. I prefer exercising alone and am not interested in socialising or competing with others – it’s all about setting my own personal challenges, which typically centre around cardio activities.”

“The social element of exercising is as important to me as the exercise itself. Group classes are a great way to spend time with friends and have fun without being competitive. I typically don’t have an exercise routine so classes need to be flexible and good value to keep me engaged.”

“My motivation for exercise is largely driven by working towards a sporting challenge or event (such as a half marathon or cycle ride). Competing against others is enjoyable but I don’t rely on them to be motivated. I also love being able to track my performance with new tech and apps.”

“I play a lot of team and 1v1 sports – I love the competition and feeling challenged! I enjoy using the weights but struggle to maintain a gym routine as I’m heavily reliant on others to motivate me, which is why I’ve signed up to personal training in the past.”

“While I’m conscious I could do more to improve my fitness, I find it difficult to motivate myself and have a routine – it’s just not enjoyable! Group classes or socialising with others while exercising does not appeal, I need to do my own thing.”

A1. On the whole, how do you feel about exercise? C2. In general, how much interest do you have in rowing (outdoor or indoor) as a sport? Base: Fitness Fanatics (95), Set Routiners (60), Personal Goal Seekers (74), Competitive Rivals (145), Socially Motivated (77), Passive Introverts (50)
Overview of segment profiles

**Higher priority segments**

- **Fitness Fanatics**
  - Slight female skew
  - Slight skew to over 35s
  - Exercise frequency (vs. other segments): High
  - Rank 3rd in terms of current rowing machine usage
  - Access to rowing machines (vs other segments): High

- **Routine Driven**
  - Slight male skew
  - Heavy skew to over 35s
  - Exercise frequency (vs. other segments): Average
  - Rank 1st in terms of current rowing machine usage
  - Access to rowing machines (vs other segments): High

- **Socially Motivated**
  - Strong female skew
  - Slight skew to over 35s
  - Exercise frequency (vs. other segments): Average
  - Rank 5th in terms of current rowing machine usage
  - Access to rowing machines (vs other segments): Low

- **Personal Goal Seekers**
  - No gender skew
  - Higher proportion of 16-24s than other segments
  - Exercise frequency (vs. other segments): High
  - Rank 6th in terms of current rowing machine usage
  - Access to rowing machines (vs other segments): Low

- **Competitive Rivals**
  - Slight male skew
  - Higher proportion of 16-34s than other segments
  - Exercise frequency (vs. other segments): Average
  - Rank 5th in terms of current rowing machine usage
  - Access to rowing machines (vs other segments): Low

- **Passive Introverts**
  - Slight female skew
  - Heavy skew to over 35s
  - Exercise frequency (vs. other segments): Average
  - Rank 2nd in terms of current rowing machine usage
  - Access to rowing machines (vs other segments): Average
<table>
<thead>
<tr>
<th>Segment</th>
<th>Opportunity</th>
<th>Challenges to overcome when targeting</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fitness Fanatics</td>
<td>Most likely segment to be indoor rowing already, enjoy their cardio work and also have highest access and consideration to use a rowing machine in the future.</td>
<td>They like other forms of exercise and are wedded to pre-existing routines; challenge is to ensure indoor rowing is considered as part of their regime and via a trusted source (e.g. gym staff).</td>
</tr>
<tr>
<td>Routine Driven</td>
<td>Already attending fitness classes so a potential prime target for group indoor rowing sessions.</td>
<td>Like to exercise with friends but not competitively. Currently have lower access and lower confidence on the rowing machine which would need addressing. Less interested in working out at the gym, therefore would need to be targeted within classes or socially driven provision.</td>
</tr>
<tr>
<td>Socially Motivated</td>
<td>Frequent exercises who are self-motivated (i.e. don’t rely on others) and love a physical challenge. With the right offer could become highly engaged with indoor rowing. Also love to track their performance.</td>
<td>Less likely than SRS and MFF to have used a rowing machine in the past so rowing confidence is lower. Need to overcome ‘boring’ perception by showing how it can be social, competitive and trackable.</td>
</tr>
<tr>
<td>Personal Goal Seekers</td>
<td>Generally very sporty and have decent fitness levels. Like to compare their performance against others and track via apps / tech. Claim to be fairly confident with using a rowing machine.</td>
<td>Less likely to have a gym membership so rowing machine access is lower. Reliant on others for their motivation therefore rowing needs to be showcased as a social and competitive sport.</td>
</tr>
<tr>
<td>Competitive Rivals</td>
<td>While less motivated and active than the other segments they at least acknowledge they could do more! Like to work out alone so there could be a role for indoor rowing with this audience, possibly around weight loss messaging.</td>
<td>More likely to be out of shape, therefore less motivated to exercise than other segments. Current fitness levels cited as a barrier, as is the perception of indoor rowing being “boring”.</td>
</tr>
<tr>
<td>Passive Introverts</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
All segments need to be taught the basics of indoor rowing

**Taught the correct technique**
- How to position themselves correctly on the machine
- What technique to use when rowing
- Delivered via a PT, member of gym staff, or technology to assess technique

**Shown how to use the machine**
- How to use the screen and programme settings
  - How to set programme based on my needs e.g. to reach a distance or calories burned goal
  - How to see when goal reached
- Interactive screen preferred

**Told how it can work for me**
- The unique benefits of indoor rowing! e.g. all over body workout, efficient
- What programme I should use to reach my goals
- What resistance I need for my weight / height / goals
- How I can achieve my fitness targets through rowing e.g. lose body fat
- How this fits into my fitness routine

Inductions don’t really happen – when do we get the opportunity to learn?

The instructors don’t know how to use them! They never come over to help!

I need to know how the machine will fit in to my programme and what it will deliver

This needs to be prioritised, to help to educate our segments around indoor rowing and empower them to give it a try
Introducing our Fitness Fanatics

"Being active is a big part of my life. I like to be physically challenged but also appreciate the mental benefits of exercise too. Variety when working out is very important to me, as is being able to track my performance in the gym”

MOTIVATIONS TO EXERCISE

- To challenge myself
  - Pushing myself and seeing progress
  - Competing with myself and others
- Mental benefits
  - To switch off and zone out
  - To relieve stress and feel good
- Improving health and fitness
  - To prevent or treat health problems

FITNESS BEHAVIOURS

- They regularly exercise, taking part in lots of different sports & fitness activities
- They prefer to do it alone and they are most likely to belong to a gym
- More indoor rowers than average (17%) but mostly lapsed (69%)

WHAT THEY WANT FROM FITNESS PROVISION

To get in the zone
Either to switch off or to get pumped up

To push themselves
e.g. set challenges or targets or ability matched sessions

Having variety in fitness activities
Trying new things

To track their performance & compete
e.g. seeing results such as calories burnt

PERCEPTIONS OF INDOOR ROWING

Aware that it delivers fitness benefits
Gives them some variety in their workouts

But unsure how to use the machine correctly or the best technique
Not clear how it delivers to their specific fitness needs/goals
Don’t know how to track their performance

</tbody>
</table>
**Fitness Fanatics**

**Indoor rowing challenges so they can push themselves**
- On gym floor, drop in and compete
- Group or solo challenges
- Races, or challenges over time
- Leader boards in gym
- Ability to sync with friends and compete
- Attention grabbing challenges e.g. Row to France!
- Gamification of challenges e.g. row away from shark!
- Could include building up to rowing on water

**Indoor rowing classes to create excitement and engagement**
- Raise profile of rowing – make it cool!
- Spin or HIIT style classes
- Help them to get in the zone – motivational instructor, loud music
- Colourful equipment
- Ability matched sessions
- Leader board at front

**Provision to help them ‘zone-out’**
- Virtual reality rowing e.g. rowing on water, races – so they can see where they are in race
- Position rowing machines to have a nice view

**Tech and apps so they can track their performance**
- Rowactiv, LiveRowing apps appealing
- Technique videos
- Syncing your phone/ current tech and monitor progress
- Challenge/ programme/ intensity options
- Share and compare
- Would also like:
  - To be able to sync with their training programme
  - To be able to sync with friends e.g. notification when friend rows to prompt me
  - Goal led e.g. calories burned
  - To be able to save results for ongoing tracking

Helping to encourage them to choose indoor rowing over other fitness sessions and build habits
"I have a set workout routine that I stick to religiously. I prefer exercising alone and am not interested in socialising or competing with others – it’s all about setting my own personal challenges, which typically centre around cardio activities."

**FITNESS AND INDOOR ROWING BEHAVIOURS**

- They regularly exercise and like to follow a set fitness routine
- They prefer to do it alone, spending a lot of time in the gym
- The most likely to be indoor rowing currently (23%) with a large number of lapsed (65%)

**MOTIVATIONS TO EXERCISE**

- Getting the job done
  - Fitness activities are part of my weekly schedule
  - It’s about ticking it off the to-do list
- To challenge myself
  - Focusing on self-improvement
  - To get the most out of the session
- Improving health and fitness
  - Both physically and mentally

**WHAT THEY WANT FROM FITNESS PROVISION**

- A structured workout
  - So they know what needs doing to get the job done
- Goals and challenges to achieve
  - Personal challenges to help maximise the session
- A way to track their performance
  - In-the-moment and end results to help push themselves
- A way to get in the zone, undisturbed
  - e.g. not too many people so they can focus inward

**TOP SPORTS PLAYED (PAST 3 MONTHS)**

- Swimming (77)
- Running (100)
- Cycling (88)
- Home Exercise (123)
- Gym Training (153)

**PERCEPTIONS OF INDOOR ROWING**

- You can challenge yourself
- It relieves stress and provides an intense physical workout
- You can control the workout and get in the zone
- But unsure how to maximise the experience
- Not all are clear of the benefits
- Don’t know how to monitor performance

Proportion 12% Size 2m
Once taught the basics, there are a number of ways to engage our Routine Driven and embed indoor rowing in their routines

Indoor rowing classes as part of their regular routine
- Classes with new challenges periodically e.g. new distances to complete, calories to burn
- Loud music to allow them to get in the zone
- Others around them will help them to push themselves
- Regular sessions that they can schedule in

Structured workouts and plans to help them build routines and see progress
- British Rowing training plans appealing:
  - Downloadable plans to use individually
  - Workouts which incorporate other machines – fitting rowing machine into current routine
  - Workouts which will allow them to control the intensity – enabling them to push themselves

Personal performance tracking using tech / apps
- Rowactiv, LiveRowing apps appealing
  - To be able to see performance in the moment
  - Syncing your phone/current tech
  - Challenge/ programme/ intensity options
  - Would like tech to be goal led e.g. calories burned

Keeping their ‘zone’ sacred in the gym
- Stimulate senses – visual, sounds e.g. cheers from a crowd on Bluetooth headphones
- Virtual reality provision

Encouraging them to start or continue indoor rowing, sustaining behaviours
Introducing our Socially Motivated

"The social element of exercising is as important to me as the exercise itself. Group classes are a great way to spend time with friends and have fun without being competitive. I typically don’t have an exercise routine so classes need to be flexible and good value to keep me engaged."

FITNESS AND INDOOR ROWING BEHAVIOURS

- Their exercise frequency is fairly low
- They prefer working out with others or as part of a class
- They currently have lower access and confidence on the rowing machine
- Many have lapsed (71%) and only a few currently indoor row (14%)

MOTIVATIONS TO EXERCISE

- Having fun
  - The physical activity isn’t fun itself
  - So I look for fun through the environment and other people
- Spending time with others
  - Focus is on the opportunity to socialise rather than the exercise
- Looking after health as a by-product
  - Rely on social encouragement to take part, give it my all and keep it up

WHAT THEY WANT FROM FITNESS PROVISION

- Friendly faces
  - Feeling part of something social
- Friendly challenges
  - In-the-moment encouragement and enjoyment
- Support through social media
  - e.g. through recording and sharing
- Receive reassurance
  - e.g. through an expert instructor or other participants

</table>

PERCEPTIONS OF INDOOR ROWING

- Opportunity for friendly challenge
- No-one’s reassuring or encouraging them
- It’s a time-efficient workout, meaning more time socialising
- It’s not currently social
- Not aware of how to gain support through social media
Once taught the basics, the biggest opportunity for our Socially Motivated segment is making indoor rowing more social

**Indoor rowing classes that are social and fun**
- Music key to keep the session lively and fun
- Dedicated instructors, passionate about indoor rowing
  - Able to advise on technique / hand-hold
- Or VR classes
- Communal indoor rowing classes also appealing – small teams competing against each other

**Create connections through tech and social media**
- Link indoor rowing to fitness tracking devices and social media activity
- Ability to share performance, gain support and encouragement from others and compete against friends
- Ability to sync with other tech and share and compare appealing aspects of Rowactiv and LiveRowing apps

**Make the machines more visible in the gym**
- In a gym environment the position of machines can play a big role in how involved they feel e.g. raised machines, with visible TV screens
- Feeling involved and part of the gym

Creating social connections through indoor rowing will help to keep our Socially Motivated engaged
Introducing our Personal Goal Seekers

“Introducing our Personal Goal Seekers”

“Proportion 15% Size 2.3m”

“MOTIVATIONS TO EXERCISE”

- To challenge myself
  - Exercise when aiming to complete a specific sporting event / challenge
  - Like competition but not reliant on others for motivation

- Physical benefits
  - Want to see visible / physical results

- Mental benefits
  - Looking to relieve stress and tension – want to feel strong mentally

“FITNESS AND INDOOR ROWING BEHAVIOURS”

- Their exercise frequency is high (second highest of all segments)
- Exercise alone or with others; internal motivation driven by upcoming challenges / events
- Lower access and confidence on the rowing machine
- Few current indoor rowers (8%) – more likely to be lapsed (73%) or non (19%)

“WHAT THEY WANT FROM FITNESS PROVISION”

- To be set challenges
  - e.g. challenge to row The Channel

- To push themselves
  - e.g. challenge to beat their PBs

- To track their performance & compete
  - e.g. seeing results

- Social environment
  - To become part of a sporting community

“TOP SPORTS PLAYED (PAST 3 MONTHS)”

- Running (89) 31%
- Group classes (130) 35%
- Football (124) 36%
- Gym Training (78) 38%
- Swimming (100) 39%
- Cycling (98) 41%

“WHAT STOPS THEM INDOOR ROWING”

- “It’s boring”
- “It’s too repetitive”
- “Prefer other forms of exercise”
- “Get benefits I need from other activities”
Introducing our Competitive Rivals

“I play a lot of team and 1v1 sports – I love the competition and feeling challenged! I enjoy using the weights but struggle to maintain routine as I’m reliant on others to motivate me, which is why I’ve signed up to personal training in the past.”

MOTIVATIONS TO EXERCISE

- To compete against others
  - Struggle to have an exercise routine – heavily reliant on competing with others for motivation
- Working towards an event / goal
  - Train for sporting events or if I’m trying to get toned / lose weight
- Because I feel like I should
  - Enables me to eat what I want and keep my body in decent shape

FITNESS AND INDOOR ROWING BEHAVIOURS

- Their exercise frequency is average (vs. other segments)
- They prefer to exercise with others, rather than alone
- This segment has lower access and confidence on the rowing machines
- Below average levels for current indoor rowers (12%) – majority are lapsed (71%)

WHAT THEY WANT FROM FITNESS PROVISION

- Competition with others
  - e.g. team based or head to head challenges
- Flexibility and variety
  - Range of activities they can fit around their lives, on their terms
- To track their performance & compete
  - e.g. seeing results
- Set goals to work towards
  - e.g. weight loss or burning X number of calories

WHAT STOPS THEM INDOOR ROWING

- “Prefer other forms of exercise”
- “It’s not competitive enough”
- “Worried about injuring myself”
- “It’s painful to use”

TOP SPORTS PLAYED (PAST 3 MONTHS)

- Running (91) 32%

4.6m
Introducing our Passive Introverts

“While I’m conscious I could do more to improve my fitness, I find it difficult to motivate myself and have a routine – it’s just not enjoyable! Group classes or socialising with others while exercising does not appeal, I need to do my own thing.”

MOTIVATIONS TO EXERCISE
- Because I feel like I should
  - Conscious I could do more to improve my health - exercise can help with this but I struggle with a routine
- To lose weight / get thinner
  - Working towards a goal is motivating (e.g. weight loss) – I like to see physical results
- Improving health and fitness
  - To prevent or treat health problems associated with increasing age

WHAT THEY WANT FROM FITNESS PROVISION
- To do their own thing
  - I.e. not on display in front of others
- Cheap and flexible
  - e.g. pay as you go gym access
- Goals to work towards
  - Struggle with routines otherwise
- Friendly environment
  - Welcoming environment that is not intimidating

FITNESS AND INDOOR ROWING BEHAVIOURS
- Their exercise frequency is low (vs. other segments)
- They much prefer to exercise alone rather than with others
- They have average levels of access but higher confidence with using rowing machines
- Just above average levels of indoor rowers (18%) but the majority are lapsed (64%)

TOP SPORTS PLAYED (PAST 3 MONTHS)
- Running (75) 26%
- Cycling (76) 32%
- Home exercises (108) 38%
- Swimming (98) 38%
- Gym training (106) 52%

WHAT STOPS THEM INDOOR ROWING
- “It’s boring”
- “I’m not fit enough to use a machine”
- “Prefer other forms of exercise”
- “Feel too self-conscious using a machine”
Recommendations
Activating our priority segments and sustaining behaviours is a four-staged strategy

1. Teach them the basics
   - How to use the machine
     • Technique
     • Programmes and settings
   - How to make indoor rowing work for them
     • To achieve their fitness goals
     • To fit it into their routine
   - This could be achieved by:
     • Empowering gym staff/instructors to help gym goers with the basics
     • Adding a ‘technique’ 10 mins to the start of a new rowing class or challenge
     • Creating drop in ‘tips and techniques’ sessions
     • Providing downloadable technique videos / tips

2. Engage them by raising the profile of indoor rowing
   - Launch indoor rowing classes
     e.g. HIIT sessions, spin-style sessions that grab attention
   - Develop indoor rowing challenges that help to engage and raise the profile of rowing on the gym floor
   - Position rowing machines more prominently in the gym to get attention
   - Create provision that allows rowers to ‘zone out’ and de-stress, and that creates talkability e.g. virtual reality screens, rowing on water

3. Sustain indoor rowing behaviours
   - Support technology that helps them to track their performance and compete with others, that syncs with their tech
   - Deliver training plans to help communicate the benefits of rowing/how it fits in fitness programme
   - Launch online rowing leagues to allow rowers to compete vs others
   - Develop communities of rowers e.g. on social media

4. Help to make them feel like a ‘rower’
   - Create a community – Create tailored indoor rowing content, membership, subscription, newsletter, discounts to events
   - Calls to action – promote events, rowing fundraisers, challenges & competitions
   - ‘Appropriate imagery/language’ – reflect and connect with target audiences
For more information please contact:

research@britishrowing.org
