

## Safety Alert - The Incident Reporting System

The Incident Reporting system is still going strong even though there has been less rowing activity. The analysis of last year's incidents makes interesting reading. It shows that if you keep a good lookout, check your boat before you go afloat and keep to the correct part of the waterway then you will be much safer. Safety is all about what we do, it is about how we behave. Thank you to everyone who reported an incident. You are helping the rest of us to learn how to stay safe.

The complete analysis can be found [here](#).

**Take Care to avoid incidents but continue to report any that you see.**
